

The Peter Packet Package for Middle Schools Featuring the Packet Riders & the Hacker Busters

Why try it?

- It's great fun and a wonderful learning experience.
- It gives students a foundation in computer networking and technologies and encourages them to look into education and career opportunities in technology.
- It's packed with ready-to-use lessons, activities, and fun projects.
- It offers a club-based organization that helps students relate to each other in a positive manner.
- It encourages students to think beyond their personal lives as they learn about helping others with their computer knowledge.

Encourages learning about technologies and introduces technology-related careers.

The Packet Package is a valuable tool for Guidance Counselors because it gives students an understanding of the Internet while also encouraging them to pursue more rigorous studies in technology. It provides students with a basic foundation in networking and introduces them to a variety of careers in computer-related fields.

The materials and lessons provided can be used with individual students, with groups of students, with a class, or in a club setting. The club atmosphere gives students the opportunity to work with others on selected projects. The Packet Riders club is available for students aged 9 to 11 and the Hacker Busters club is for students aged 12 to 14. All of the materials you'll need to start a club are provided in the Packet Package.

Take a look at the Club Tool Kit materials to see how you can use them with your students.
