

Children's Product Report

by

Please type in the information below each item. Use as much space as you need. Answers should be written in paragraph form—the more detailed the better.

(1) Why were MP3 files were used your product?

(2) How did the MP3 files travel from one partner's computer to the other partner's computer?

(3) What may have happened if hacker packets interfered with transfer of data? What other types of difficulties may the music files have faced as they traveled through satellite connections?

(4) How would you have collaborated on your product if you didn't have Internet access?

(5) Describe your product and how you are going to advertise it to the class.
