

## Tasks to Be Completed

*You have completed high school and college and have a successful career as a children's product designer.*

*Your tasks are as follows:*

1. , Check out the Boowa & Kwala site <<http://www.uptoten.com/kids/boowakwala-home.html>> for ideas about how some people use music files to entertain children.
2. Think about what your group might "design" that little kids would really love. Remember, the design must make use of an MP3 file. The product you are to design could be an Internet activity like the ones on the Boowa & Kwala site, a toy, or a game.
3. Go to Kiddie Records < <http://www.kiddierecords.com>>, a site that offers free and legal downloads of children's music. With your partner or group, check out the music. Then pick one file to download.
4. Work with your group to design a children's product using the music you downloaded.
5. Make a drawing of your idea on the computer. Label the parts of the product.
6. Working on your computer (using no paper), work with your group to prepare a report on your product. Email the completed report to your teacher.
7. With your group be ready to introduce your product to your class. Make sure to use the music.
